Policies and legislative instruments to implement the Clean Industry Package

Figure D.13

Clean Industry Package

Energy Union Governance Framework

	11 POLICY PROPOSALS	RELEVANT LEGISLATIVE INSTRUMENTS
Upstream	→ Hydrogen investment support policy-framework → Robust clean hydrogen sustainability criteria → Industrial energy & CO_2 infrastructure planning & financing	→ Renewable Energy Directive Clean H_2 enabling framework → Hydrogen Sustainability Criteria Regulation (under REDII) → Energy Union Governance Regulation & TEN-E Regulation
Midstream	→ Carbon Contracts for Difference (CCfD) → Capital de-risking instruments for unproven technologies → Climate neutral production standards → Reformed anti-carbon leakage system	→ New CCfD Enabling Policies (state aid; criteria; EU funding) → Innovation Fund Regulation (ETS Directive) → Industrial Emissions Directive & Eco-labelling → EU ETS Directive; State Aid Guidelines (2021); new BCA framework
Downstream	→ Climate surcharge on CO_2-intensive final products → Requirements & labels for embedded CO_2 in intermediate & final products → Recycling quality targets & end-of-life obligations → Public procurement requirements	→ Climate surcharge on basic materials-intensive products → Energy Performance in Buildings Directive & Eco-design → Waste Framework Directive (End of Life Vehicles regulation, CDW*) → Public Procurement Directive

Agora Energiewende, 2020

Note: CDW stands for Construction and Demolition Waste
