Türkiye's opportunities from accelerating steel sector decarbonisation to 2050 → Fig. 1

Agora Industry (2026). Investment estimates reflect the Accelerated Decarbonisation Scenario over a 20-year period. The cumulative and annual investment figures represents the present value of future investments, using 9% discount rate. The estimated 24,600–28,800 jobs include temporary employment during construction and installation and permanent employment in operation and maintenance across solar PV, wind, electrolyser and hydrogen-based direct reduced iron (H_2-DRI) activities; temporary employment is annualised over a 20-year project lifetime.
